

2015 DONORS

SOUTHFACE

CAMPUS

The Southface Eco Office opened in 2009 and is constructed entirely from off-the-shelf products, materials and technologies. These generous sponsors provided materials and services to provide a campus refresh in 2015. The refresh was driven by a holistic approach to sustainability in our built environment. It was rooted in evidence-based design around enhancing health and well-being. A survey of Southface employees inspired decisions regarding materials, color selection and needs for flexible workspaces. These choices were reinforced by third-party research in environmental psychology and biophilic design.

Allsteel

RECEPTION AREA FURNITURE

Allsteel Belong side tables in our reception area are lightweight aluminum with a light cherry top. Allsteel's major product lines meet the BIFMA e3 Furniture Sustainability Standard, a voluntary sustainability standard created by the Business + Institutional Furniture Manufacturer's Association.

Bosch

RESOURCE CENTER AND ECO OFFICE APPLIANCES

Bosch relishes a challenge. Bosch appliances are powerful, precise, intuitive to use, quietest in class and extremely energy- and water-efficient.

ECOS Paint

RESOURCE CENTER AND ECO OFFICE PAINT

ECOS water based, organic paint was the first North American paint to complete the Health Product Declaration (HPD) for LEED v4. HPD is an impartial tool for the accurate reporting of product contents and each ingredient's relationship to the bigger picture of human and ecological health.

Eutree, Inc.

RECLAIMED WOOD FOR RECEPTION AREA

Eutree is a boutique lumber mill that is changing the supply stream for fine hardwood lumber by interrupting the journey of hardwood trunks from urban tree services to waste. Local sourcing of hardwoods felled in metro Atlanta provides sustainably produced products at an affordable price.

GAF

RESOURCE CENTER ROOF SHINGLES

GAF's ENERGY STAR® rated Timberline Cool Series shingles are designed to mitigate heat absorption and reduce overall thermal gain within the house. Roofing granules reflect UV radiation to achieve an impressive Solar Reflectance Index of 29 (conventional shingles are less than 20).

Greyter

RESOURCE CENTER GREYWATER SYSTEM

Greyter's residential out-of-the-box water reuse systems offer affordable, practical solutions for saving water. The Greyter HOME reduces water consumption by 30-35 percent.

Interface

TRAINING CENTER CARPET TILES

The Interface Human Nature Collection is made of up to 81 percent total recycled content, including 100 percent recycled content nylon face fiber and our highest post-consumer recycled content backing. At the same time, these products can be recycled via Interface's ReEntry® recycling process.

Johnsonite BaseWorks

ECO OFFICE WALL BASE

BaseWorks® thermoset rubber wall base has recycled content and is recyclable. The product has an environmental product declaration (EPD) in accordance with ISO 14025, which includes Life Cycle Analysis (LCA). BaseWorks® provided by **Johnson Wholesale Floors**

Mohawk Flooring

WORKSPACE AND CLASSROOM CARPETING

Mohawk is leading the building products manufacturing industry in transparency, with Declare labels, HPDs, and EPDs as well as 350+ red list free flooring products. Mohawk partnerships with leading non-profits include Southface and the International Living Future Institute (ILFI). All Mohawk Group product certifications and labels are listed at GreenWizard.com and mohawkgroup.com.

Occupied Renovations

RENOVATION CONTRACTOR SERVICES

Occupied Renovations merges the typical services required for a commercial renovation, such as design, floor covering, furniture procurement, and wall covering into one complete package. Their process minimizes disruption to the workday and reduces waste when renovating existing work spaces.

ROMA paint

RECEPTION AREA GRAPHIC AND RESOURCE CENTER EXTERIOR STAIRCASE

ROMA is the first paint manufacturer in the world to achieve Cradle to Cradle 3.0 certification (for 13 interior and exterior products in its Domus line). ROMA paints are mineral paints—made from potassium silicate.

Steelcase

AUXILIARY FURNISHINGS

Steelcase products have high recycled content to achieve 3rd party certifications such as Cradle to Cradle and BIFMA e3. In addition to designing furniture for easy disassembly, allowing pieces to be separated quickly for replacement or recycling, Steelcase offers multiple programs to extend a product's lifespan through reuse and recycling, refurbishing and donating.
